

## Sunjoy® Cinnamon Japanese Barberry - New For 2020!

*Berberis thunbergii 'Celeste'*

Height: 5 feet

Spread: 5 feet

Sunlight: ○ ●

Hardiness Zone: 4

### Description:

A standout shrub producing bright orange-red foliage all summer long, maturing to scarlet in fall; very showy, great as a color contrast in the landscape; plant on slopes, in beds, or as a border

### Ornamental Features

Sunjoy Cinnamon Japanese Barberry has attractive dark red foliage which emerges orange in spring. The small oval leaves are highly ornamental and turn outstanding shades of scarlet and orange in the fall. Neither the flowers nor the fruit are ornamentally significant.

### Landscape Attributes

Sunjoy Cinnamon Japanese Barberry is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Sunjoy Cinnamon Japanese Barberry is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

## Planting & Growing

Sunjoy Cinnamon Japanese Barberry will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
